

HVAC NET ZERO CARBON

CONTINEWM® Net is an innovative patented solution made in Japan that seamlessly integrates into any Air Conditioning systems to increase zero-carbon, improve air quality and mitigate climate change, while also saving money on energy costs.

Continuous Operation

Less CO2 Emission

Easy Installation

Cassettes

AHU

Splits

Same AC Setup

Winter/Summer

T°C Comfort Homogeneity

Energy Savings
20-25% average savings on air conditioning consumption

Net Zero
Less electricity consumed, **less carbon emitted** for power production

Fast ROI
Between **1-3 years** compare to solar panel

Improve Air Quality
Up to **60% less PM 2.5** in indoor spaces

Less CO₂, More Savings
